

Act on Climate Change, or Ignore It?

Our **Climate Justice Tribunal** will debate an indictment of the governments, corporations, and people of Canada for climate crimes against Nature and humanity

WE'LL SEE YOU IN COURT

COURT CONVENES ON

**Sunday
October 16
2 p.m.**

OISE, Room 5280
252 Bloor St. W.
Toronto

We are bombarded by news of global warming and environmental destruction. Yet the world's governments, who will meet November 28 in Durban, South Africa, in another climate change conference, are masters of inaction.

Canada is called one of the worst carbon-emission offenders. And we, the people of Canada, are we carrying through on our responsibility to restore harmony with nature?

As a participant in **our mock trial on October 16**, you will compare the conflicting agendas of the government, corporations, and the people of Canada. You will weigh how their and our actions and inaction could make all of us climate criminals.
